

COMMUNIQUÉ DE PRESSE

La Ciotat, November 18th 2005

MG International settles in Spain

MG International creates MG Ibérica SL, its Spanish subsidiary

Designer and manufacturer of swimming pool alarm systems since 2002, MG international has shown its strong innovation skills, its reactivity and production capacity in the French territory.

By creating MG Ibérica SL, MG International shows its interest and its implication in the Spanish market. Second in Europe by the number of private swimming pools installed, Spain naturally constitutes the market in which MG International continues to develop itself.

MG Ibérica makes the Spanish owners benefit from the recognised quality and the performances of the Aquasensor range.

Composed of 3 immersion detectors, the Aquasensor range is exclusively sold to the users by professionals.

Get to know MG International better

Located in La Ciotat – South of France- since 2002, MG International is a creator and producer of swimming pool alarm systems.

MG International is specialised in the production of immersion detectors, and has a R&D department within the company's offices and an assembly line of 950 m².

MG International is the pool safety French leader among all safety systems, and proposes in 2005 a complete range of immersion detectors in compliance with the French standard NF P90-307/A1.
